

## Phase noise tolerant carrier recovery scheme for 28 Gbaud circular 16QAM - DTU Orbit (08/11/2017)

### Phase noise tolerant carrier recovery scheme for 28 Gbaud circular 16QAM

We propose a novel carrier phase recovery scheme for circular 16QAM coherent transmission systems. Experimental results show low penalties (

#### General information

State: Published

Organisations: Department of Photonics Engineering, High-Speed Optical Communication, KTH - Royal Institute of Technology, RISE ICT

Authors: Navarro, J. R. (Ekstern), Iglesias Olmedo, M. (Ekstern), Kakkar, A. (Ekstern), Pang, X. (Ekstern), Ozolins, O. (Ekstern), Schatz, R. (Ekstern), Jacobsen, G. (Ekstern), Popov, S. (Ekstern), Zibar, D. (Intern)

Number of pages: 3

Pages: 1-3

Publication date: 2015

#### Host publication information

Title of host publication: 2015 41st European Conference on Optical Communication (ECOC)

Publisher: IEEE

ISBN (Print): 9788460817413

Main Research Area: Technical/natural sciences

Conference: 41st European Conference and Exhibition on Optical Communications, Valencia, Spain, 27/09/2015 - 27/09/2015

optical communication, phase noise, quadrature amplitude modulation, Communication, Networking and Broadcast Technologies, Photonics and Electrooptics, circular 16QAM coherent transmission systems, coherent optical transmission systems, error floor, FEC limit, linewidths, Optical attenuators, Optical modulation, Optical noise, Optical receivers, Optical transmitters, Phase noise, phase noise tolerant carrier recovery scheme, Signal to noise ratio, square 16QAM
